What is OER?

- Open educational resources (OER) are teaching, learning, and research resources that are in the public domain or have been released with an open license.
- Anyone can freely use, copy, adapt, and reshare OER.
- OER include digital learning materials, such as:
 - Open textbooks
 - Full courses
 - Modules
 - Syllabi
 - Lectures
 - Homework assignments
 - Quizzes
 - Lab activities
 - Games
 - Simulations

Different Ways to Utilize OER

According to opencontent.org, to be considered "open," educational resources must be free and give users the freedom to do the 5 R's:

- Retain: make, own, and control copies of the content (e.g., download, duplicate, store, and manage)
- Reuse: use the content in a wide range of ways (e.g., in a class, in a study group, on a website, in a video)
- Revise: adapt, adjust, modify, or alter the content itself (e.g., translate the content into another language)
- Remix: combine the original or revised content with other open content to create something new (e.g., incorporate the content into a mashup)
- Redistribute: share copies of the original content, your revisions, or your remixes with others (e.g., give a copy of the content to a friend)
